Prescription Diet Canine d/d

✓ Dietary sensitivity

✓ Gastrointestinal disease

Canine d/d Lamb & Rice and Whitefish & Rice
Trays of 12 cans of 415 g

Canine d/d Egg & Rice, Duck & Rice and Salmon & Rice:
Bags of 2 kg, 5 kg and 14 kg

Egg & Rice

Duck & Rice

Salmon & Rice

✓ Indications

- Food allergy or food intolerance (with dermatological or gastrointestinal signs).
- Use as an Elimination Diet.
- Pancreatitis, without hyperlipidaemia (use Canine d/d dry).

✗ Not recommended for

- Cats.
- Puppies.
- Pregnant or lactating bitches.

➕ Additional information

- Five novel protein formulas combine a single animal protein source (lamb, whitefish, egg, duck or salmon) with rice.
- For increased palatability, dry formulas are coated with hydrolysed chicken. This hydrolysate has an average molecular weight <6,000 daltons and no intact protein molecules to avoid an allergic reaction.
- May benefit dogs with chronic otitis externa, interdigital pruritus and perianal pruritus, which can be signs of an adverse food reaction.
- In acute pancreatitis, feed Canine d/d dry only after the initial stage during which all food and liquid by mouth are withheld.

Other products to consider

- For use as an Elimination Diet (for maximum reliability in the identification of dietary sensitivity): **Prescription Diet Canine z/d* ULTRA Allergen-Free**.
- To manage and eliminate adverse reactions to food: **Prescription Diet Canine z/d* ULTRA Allergen-Free** or **Prescription Diet Canine z/d* Low Allergen**.

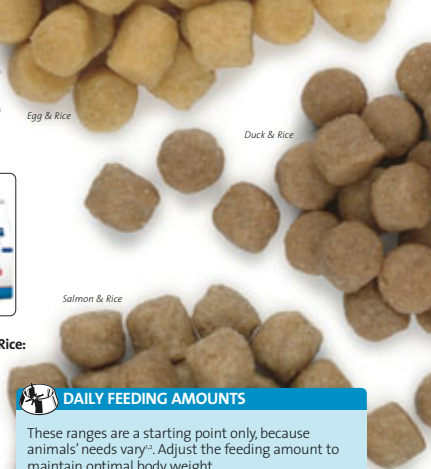

KEY BENEFITS

Protein	Single, novel animal source Highly digestible Reduced amount	Helps avoid common food allergens. Limits the amount of undigested protein in the gastrointestinal tract able to provoke an allergic reaction.
Number of novel protein formulas	Five	Increased choice (related to suspected allergy and patient preference).
Carbohydrate	Solely from rice	Allergy to rice is rare.
Superior antioxidant formula	Added (dry)	Reduces harmful free radicals. Skin cells are particularly vulnerable to oxidative damage.

DAILY FEEDING AMOUNTS

These ranges are a starting point only because animals' needs vary^{1,2}. Adjust the feeding amount to maintain optimal body weight.

Body Weight kg	Lamb & Rice Cans (156 g)	Whitefish & Rice Cans (156 g)	All Dry formulas grams
2.5	1/3 - 1/2	1/3 - 1/2	50 - 70
5	1/2 - 3/4	2/3 - 1	85 - 115
10	1 - 1 1/3	1 1/4 - 1 1/2	145 - 195
20	1 2/3 - 2 1/4	2 - 2 2/3	240 - 330
30	2 1/4 - 3	2 1/2 - 3 1/2	325 - 450
40	2 2/3 - 3 2/3	3 1/4 - 4 1/2	405 - 555
